You can also search for all vacancies on our website by using the search box. International – The Master of Science (MSc) in Supply Chain Technology General information The Master of Science in Supply Chain Technology (MSc in Supply Chain) is a two-year Master degree programme offered at the core of the business faculty of Erik Müller Business School Amsterdam (EMS). The course builds upon the knowledge gained through previous studies (e.g. Law and Business Administration, Accounting, MIS and Operations Management) and prepares you for a career in Supply Chain Management. Master Thesis During the course of the Master programme, the students develop and present their research and develop their professional skills in the international context in a team of four. The research project can focus on all aspects of Supply Chain Management, from the strategic level to the operational level. During the Master's Thesis the student will be trained and develop his or her own competencies and skills. To help you define your focus, we have arranged several options: - general thesis on the theme of "The role of Supply Chain Management in the world of tomorrow" - thesis on a specific industry (i.e. e-commerce) - thesis on a specific supply chain topics (i.e. e-logistics) In addition, you can choose between thesis that are on the same topic, but provide different contributions to a subject. The programs of the Master's Thesis form
